Q: Is your Organic Hemp Seed Protein Powder allergen-free?

A: Yes, our **Organic Hemp Seed Protein Powder** contains all nine essential amino acids, making it a complete protein source.

Q: What is the difference between cold-pressed and supercritical CO2 extraction?

A: **Cold-pressed** uses mechanical pressure to separate the oil and protein, preserving nutrients. **Supercritical CO2 extraction** is a more advanced, solvent-free method used for the 80% protein to achieve higher purity and concentration by separating compounds using CO2 under specific temperature and pressure.

Q: How should I store my Organic Hemp Seed Protein Powder?

A: For optimal freshness, store your **Organic Hemp Seed Protein Powder** in a cool, dry place away from direct sunlight. Sealing the bag tightly after each use is also recommended.

Q: Can I use Organic Hemp Seed Protein Powder if I have allergies?

A: Hemp is generally considered hypoallergenic. However, if you have specific allergies, please consult with a healthcare professional before incorporating any new supplement into your diet.

Q: What is the recommended serving size?

A: Serving sizes can vary based on individual dietary needs and protein requirements. A common serving size is 20-30 grams (about 2-3 tablespoons), but it's best to adjust based on your personal goals.
