

Organic Refined Hemp Seed Oil

This product is derived from certified industrial hemp. It contains no CBD, no THC, and is compliant with all applicable food and agricultural regulations.

Price: ~~\$5.60~~ Original price was: \$5.60. \$4.40 Current price is: \$4.40.

While virgin hemp oils are prized for their raw color and aroma, our **Refined Hemp Seed Oil** is the gold standard for formulators requiring a neutral base without sacrificing the iconic fatty acid profile of the hemp plant. Through a physical refining process (Refined, Bleached, and Deodorized - RBD), we remove the volatile components and pigments that can interfere with delicate scents or colors in finished products.

The Refining Advantage

Our refining process is strictly controlled to ensure that while the chlorophyll (green color) and nutty odor are removed, the vital **Omega-3 and Omega-6 fatty acids** remain intact. This results in a clear, pale-yellow oil with a significantly higher smoke point and longer shelf life.

Product Specifications

Feature	Refined Organic Hemp Seed Oil
Appearance	Clear, Light Yellow / Translucent
Odor/Flavor	Neutral, Odorless (Deodorized)
Extraction Method	Cold-Pressed & Physically Refined
Refining Grade	RBD (Refined, Bleached, Deodorized)
Smoke Point	~232°C (High Heat Stability)
Free Fatty Acids	< 0.1%
Peroxide Value	< 1.0 meq/kg (High Oxidative Stability)

Key Benefits for Formulators

- **Color & Scent Neutrality:** Perfect for luxury skincare and cosmetics where a green tint or “grassy” smell is undesirable. It allows your added essential oils and active ingredients to shine.
- **Increased Oxidative Stability:** The removal of impurities results in an oil that is less prone to rancidity, extending the shelf life of your retail products.
- **High Smoke Point:** Unlike virgin oils, the refined version can withstand higher temperatures, making it suitable for specific culinary applications or heated cosmetic emulsions.
- **Deep Skin Penetration:** Retains its “dry oil” characteristic, absorbing rapidly into the stratum corneum to deliver essential lipids without a greasy residue.

Frequently Asked Questions

Q: Does refining remove the nutritional benefits of hemp oil?

A: The primary nutritional value of hemp oil lies in its Essential Fatty Acids (EFAs). Our physical refining process preserves these fats. However, it does remove most of the chlorophyll and some minor antioxidants like certain tocopherols.

Q: Is this oil still “Organic”?

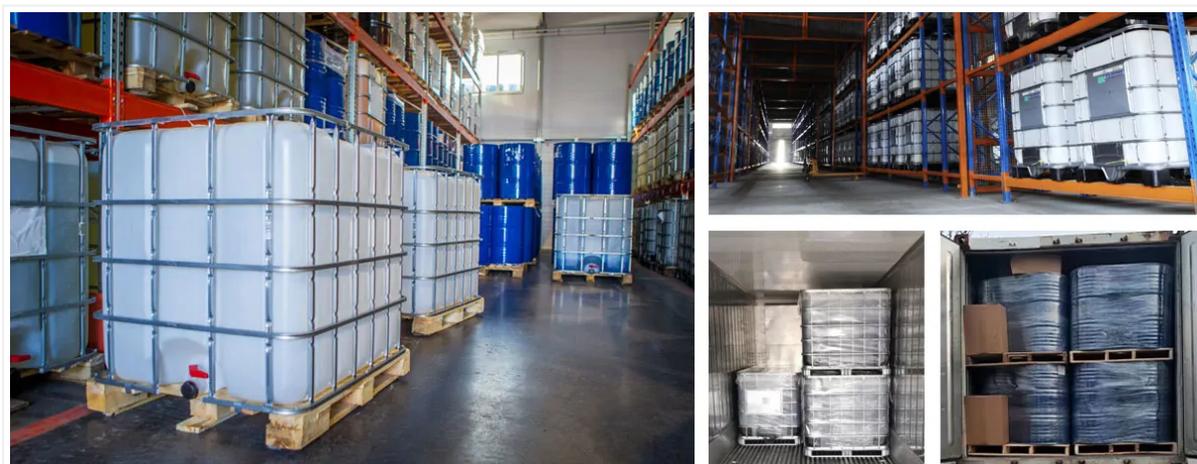

A: Yes. We offer **Certified Organic Refined Hemp Seed Oil**. The refining process uses physical clays and steam rather than harsh chemical solvents (like hexane), maintaining its organic integrity.

Q: Why choose Refined over Virgin Hemp Oil for skincare?

A: Refined oil is preferred for high-end face creams or white-base lotions where a green color would look unappealing. It also prevents the “hemp scent” from clashing with delicate perfumes or floral notes.

Q: How does the shelf life compare to Virgin Hemp Oil?

A: Refined hemp oil generally has a longer shelf life (up to 18-24 months) because the components that trigger early oxidation are removed during the RBD process.
